experience

Founder & designer @ Design Studio Wim Mees

2000 – present

I am responsible for the management of my own design studio. I work as a freelancer for small business owners and larger firms. From websites to e-learnings, mostly design based work but often combined with process optimisation and/or pedagogical advise.

Teacher & IT coordinator @ Sint-Jozefinstituut Buso Antwerp

2006 – 2020

2022 – present

I teach at a school for challenged youth were I also manage the entire IT department. It's a fun and challenging combination were I can combine my people skills with my technical IT skills. This is where I got the expertise of teaching students, but also adult colleagues.

Communication expert @ Campus De Brug Vilvoorde

2020 – 2022

I did a temporary job as communication expert. My main job was to digitise and optimise this school's processes like registration, external and internal communication, branding, etc... A very rewarding job since I noticed instant results of my job/optimisations.

Freelance designer @ CryptoNet

2000 – present

This was my first job as a designer and I still work for this company as a freelancer. Mostly to design and set up WordPress websites but they also contact me for logo's and brandings. A place where I can hit or miss, learn and develop as a person and a designer

Hospitality host & VIP coordinator @ Sportpaleis Antwerp

2009 – 2014

After being a hospitality host for years myself I was in charge of a team of hosts who had to receive and serve VIP guests at different concerts and events. Making sure the night went without incidents and everybody left happy was my main focus/job.

Various student jobs

From the moment I was allowed I worked for my money. From baking burgers to selling computers and mobile phones. During my school holidays I worked as a volunteer and animator at KENA camps. All my bosses described me as loyal, trustworthy and ambitious. They usually offered me a permanent job but I was chasing my Teacher/Designer dream!
